TRDC Climate and Sustainability Impact Assesment

Score / Colour Code	Impact and Recommendation
Dark green (4)	Strong positive impacts for sustainability. Recommendation to proceed as is with
Light green (3)	Some positive impact for sustainability. Recommendation to further enhance this
Yellow (2)	Some possible negative impacts for sustainability. Recommendation to review the
Red (1)	Considerable inconsistency with the council's sustainability objectives. Stro
Grey (0)	Neutral or not applicable. Recommendation to consider how benefits could be acl

Guidance for use

Please answer all questions from the drop-down options in the 'impact' column (C), including 'not applicable' as needed.

Please email your completed copy of the form to Joanna.Hewitson@threerivers.gov.uk.

Key to the colour coding of answers is given at the top of the page.

Name of project/policy/procurement and date	Temporary Acco
Brief description (1-2 sentences):	The Council's To particular, cover with the Council

	Homes, buildings, infrastructure, equipment and energy			
	Question	Impact (select from list)	Score (-1 to 4)	Justification or r
	What effect will this project have on overall energy use (electricity or	Neutral or not applicable. Recommendation to consider how benefits could be achieved in this		
1	other fuels) e.g. in buildings, appliances or machinery?	area, but otherwise proceed.	0	
2	What effect will this project have on the direct use of fossil fuels such as gas, petrol, diesel, oil?	Neutral or not applicable. Recommendation to consider how benefits could be achieved in this area, but otherwise proceed.	0	
	Does this project further maximise the use of existing building space? E.g. co-locating services; bringing under-used space into use; using buildings out-of-hours	Neutral or not applicable. Recommendation to consider how benefits could be achieved in this area, but otherwise proceed.	0	
	Will any new building constructed or refurbished be highly energy efficient in use? (e.g. high levels of insulation, low energy demand per sq. m., no servicing with fossil fuels such as gas heating, EPC	Neutral or not applicable. Recommendation to consider how benefits could be achieved in this area, but otherwise proceed.	0	
	Does this make use of sustainable materials / unputs in your project? E.g. re-used or recycled construction materials; timber in place of concrete	Neutral or not applicable. Recommendation to consider how benefits could be achieved in this area, but otherwise proceed.	0	
6	Does this use more sustainable processes in the creation of the project? <i>E.g. modular and off-site construction; use of electrical plant instead of petrol/diesel,</i>	Neutral or not applicable. Recommendation to consider how benefits could be achieved in this area, but otherwise proceed.	0	
7	Will this increase the supply of renewable energy? e.g. installing solar panels; switching to a renewable energy tariff	Neutral or not applicable. Recommendation to consider how benefits could be achieved in this area, but otherwise proceed.	0

Ways to optimise sustainability and work towards net zero carbon:

Insulate buildings to a high standard.

Include energy efficiency measures when carrying out refurbishment to deliver improvement in EPC ratings. Replace gas boilers with renewable heating, such as heat pumps. Consider District Heat Networks where appropriate.

- Construct new buildings to Passivhaus standard.

- Design and deliver buildings and infrastructure with lower-carbon materials, such as recycled material and timber frames.

- Use construction methods that reduce overall energy use, such as modular, factory-built components, or use of electrical plant on-site.

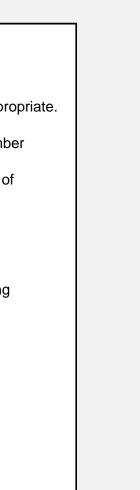

Install solar panels or other renewable energy generation, and consider including battery storage.

Switch to a certified renewable energy provider e.g. utilise power purchase agreements (PPA)

Use energy-efficient appliances.

- Install low-energy LED lighting.

- Install measures to help manage building energy demand, such as smart meters, timers on lighting, or building management systems.

Ways to optimise sustainability and work towards net zero carbon:

- Reduce the need to travel e.g. through remote meetings, or rationalising routes and rounds.
- Share vehicles or substitute different modes of travel, rather than procuring new fleet.
- Specify electric, hybrid, or most fuel efficient vehicles for new fleet or for services involving transport.
- Support users and staff to walk, cycle, or use public transport e.g. with cycle parking, training, incentives. Use zero-emission deliveries
- · Model and mitigate the project's effect on traffic and congestion e.g. retiming the service or deliveries

Ways to optimise sustainability and work towards net zero carbon:

Procure goods through sharing, leasing, or product-as-a-service models rather than ownership.

- Use pre-owned and reconditioned goods, and reduce reliance on procuring new goods.
- Use recycled materials, and procure items that can be reconditioned or recycled at end-of-life.

- Use lifecycle costing in business cases to capture the full cost of operation, repair and disposal of an item. - Ensure meat and dairy is high-quality, high-welfare.

- Design waste, including food waste, out of business models e.g. separating (and composting) food waste; replacing single-use items with reusable items.

- Use contact points with residents, community groups and businesses to engage and enable them to adopt low-waste, low-carbon behaviours.

Ways to optimise sustainability and work towards net zero carbon: (Seek advice from Landscapes Team if required)

- Avoid converting green space to hard surfacing.

- Use underutilised space for planting, such as green roofs and walls.

Plant native plants and perennials, rather than non-native ornamental species, to encourage biodiversity.

- Reduce trimming of grass and hedges, and avoid use of synthetic pesticides.

- Provide space for animals e.g. long grass areas, bird boxes, bat boxes, 'insect hotels', ponds, hedgehog hides and passages, log piles

- Consider the ecological impacts from manufacture and use of procured goods, e.g. water pollution; water consumption; land use change for farming; pesticide use; organic/regenerative farming methods

Ways to optimise sustainability and work towards net zero carbon:

- Install water-saving devices in taps, showers and toilets

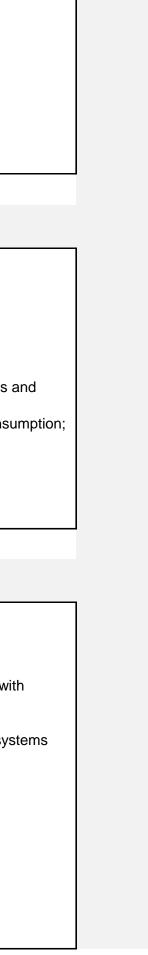

- Re-use grey water in new developments

-Capture and re-use rainwater where possible e.g. water butts for use in car washing, watering garden, toilets - Ensure all new building or refurbishment (especially of homes) models and mitigates future overheating risk, with adequate ventilation and shading

- Avoid increasing areas of hard surfacing.

- Convert hard surfacing to green and permeable surfacing where possible, and install Sustainable Drainage systems (SUDS).

Plant drought-tolerant plants and mulch landscapes to avoid water loss through evaporation.
